ASSE 6005 Medical Gas Generalist Course Bulletin

About EMGS, Inc.: EMGS is a nationally recognized agency certified to teach ASSE 6000 Series courses. All courses are taught by a credentialed ASSE 6050 medical gas instructor. EMGS has its own course that is approved in multiple states. EMGS prepares candidates to pass the Medical Gas Accreditation (MGA) certification exam as well as the National Inspection Testing Certification (NITC) exam. Both credentialing companies offer ASSE 6010 certification, as well as other ASSE 6000 certifications.

General Information: This standard provides general knowledge of medical gas and vacuum systems for the purpose of providing continuing education.

Prerequisite: None

Course Information: Persons wishing to obtain the ASSE 6005 medical gas installer certification must attend a 24-hour training course. Please refer to the course schedule for dates and locations. Cost information can be found by viewing the course flyer. All training materials are included in the course cost.

Exam Information: Candidates must pass a 100 question, multiple choice exam, either open book or closed book depending on which credentialing company issues the exam. The exam is proctored by an approved proctor, and credentials are issued by MGA or NITC. For the open book exam, candidates will receive their grade the same day as testing, provided the exam is taken on a computer. Candidates will receive a card and certificate from MGA or NITC after successfully completing the multiple choice exam. Retesting is available for an additional fee, but must be arranged through MGA or NITC.

Renewal Process: Generalists must renew their license every three years by taking a course and exam on changes that have been made to the NFPA 99 code book editions. Candidates should consult their license to verify expiration dates.

Application Process: To register for a class, candidates must complete either the ASSE 6005 application (for MGA) or the NITC medical gas generalist application (for NITC) and return it to EMGS via fax, mail or email. Please note that all exam fees are included in the EMGS course cost.

(cont., next page)

PLEASE NOTE: Not all ASSE 6010 courses will offer both MGA and NITC certification. Please check with EMGS before submitting applications, to see which credentialing company will be issuing the exam for the particular course that you may be interested in.
